Dear madam/sir, on behalf **AIMNETWORK ASSOCIATION** and **SAMSUN GOVERNORSHIP EU AND FOREIGN RELATIONS COORDINATION CENTRE**, I'm contacting you about our new in service training courses under Erasmus+ program, Action KA1 in **SAMSUN, TURKEY**, entitled:

INTERCULTURAL EDUCATION ON AN E-LEARNING PLATFORM ENVIRONMENT (MOODLE)

SAMSUN - TURKEY

SOME WORDS ABOUT OUR COURSE

The Course is for teachers, policy makers, stakeholders and who are involved in school management, EDUCATION (TYPICAL AND ADULT). It focuses on improving the participants' curricula on intercultural education, to enable them to face the new challenge's of multiculturalism by exploring their possibilities and giving them new opportunities to develop new skills and ideas for classroom management. Intercultural education adds new knowledge and aims to reinforce past knowledge by giving skills that will be imparted during the course. Strategies and best practices are also required for managing intercultural classrooms and dealing better with students from diverse cultural backgrounds. In schools today, pupils have a good digital literacy, whereas often senior teachers face challenges to keep up with digital technology.

- A special group page will be provided to the participants to get each other, to break the ice and to gain some time before starting the course.
- The participants will be introduced to various aspects of multiculturalism, the strategies and best practices to introduce in their schools by integrating them in a special forum, within a social network. We will also help the participants avoiding stereotypes, ethnocentrism, and other common conceptions regarding the coexistence with people from diverse cultural and religious background.
- Part of the workshop involves teaching ICT programs such as how managing an e-learning platform, how upload courses and give a synchronous lesson in a virtual classroom with real pupils. Through e-learning platform teachers will discover how is possible teaching in a synchronous mode at distance and reach students everywhere and help them in order to **avoid early school leaving**. Pupils with every kind of difficulties as disabilities, or geographical obstacles can be advantaged by distance learning.
- Blog building and group pages on social networks, to ensure group cohesion and communication with pupils.

All these strategies will contribute to create confident teachers and an open minded school environment. We would like underlining the Interculturality's importance and value in the society and in the school. The training will also focus on EU funding opportunities and grants for training and innovation. The European Commission allocates part of the EU budget to the companies and organizations in the form of calls for tender, in order to give individuals the chance to improve their competence in different innovation programs. Programs, such as ERASMUS+ offer the opportunity to the participants to improve their skills, wider perspectives and also to provide more opportunities to their pupils. The participants will gain an intercultural knowledge and a platform for thinking and talking on intercultural education issues. They will, then be more familiar with the concept of the course and the course can be tailored to their own needs. After the training course the participants will have the opportunity to attend in different institutional forums to gain a wider vision on intercultural issues.

PROGRAMME OF THE TRAINING ACTIVITIES

In the languages of the training: *English, Italian, Greek, Turkish*

Day 1	
09,00 – 09,30	Welcome and introduction of participants
